Introduction

The Wakefield District School Health Survey 2022 was carried out with Year 5, Year 7 and Year 9 pupils between January and May 2022. The survey was conducted online.

Wakefield Council Public Health would like to express their sincere gratitude to schools and pupils for taking part in this valuable research.

The Wakefield Council Public Health service have been running the School Health Survey every two years since 2009 as a way of collecting robust information about young people's health and lifestyles.

This survey is an essential source of data for both schools and local authority commissioners alike, providing detailed and robust information about the health behaviours and lifestyle choices of the children living in the Wakefield district.

The content of the survey is widely consulted upon and uses age-appropriate questions where necessary. In total, 1,813 valid responses were received from Year 9 pupils from across 16 schools.

How to Read the Report

Some response options have been combined e.g. "Strongly agree" and "Agree" to show "Total Agree".

Pupils were able to skip questions, so the base size varies between questions.

There are several reasons why responses in charts/tables might not add up to 100%:

- Respondents might have been able to give more than one answer
- Only most common responses might be shown
- Individual percentages are rounded to nearest whole number.

In the inequality and area analysis tables red and green shading denotes statistical differences at the 95% confidence level.

Most and least deprived cohorts have been determined using the deprivation levels for the area in which pupils say they live.

For area analysis purposes Wakefield Girls High School has been included in the Wakefield Central and North West cluster.

Headline Findings

Diet and Oral Health

42% did not have breakfast this morning

64% think their diet is healthy

52% have been to the dentist in the last 6 months

55% eat fruit and veg on most days

57% think they need to eat more healthily

79% brush their teeth at least twice a day

Headline Findings

Physical Activity and Smoking

27% think the amount of physical activity they do is not enough to keep healthy

26% think they don't have the time to be more active

48% usually walk to school

18% ride a bike more than once a week

30% of pupils take part in running, making it the most popular sport

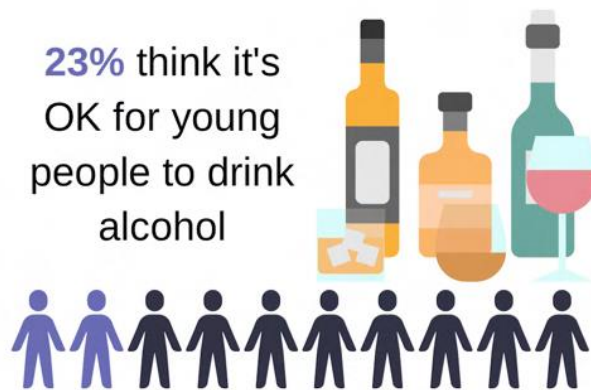

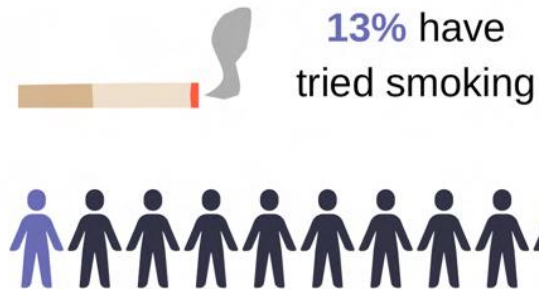

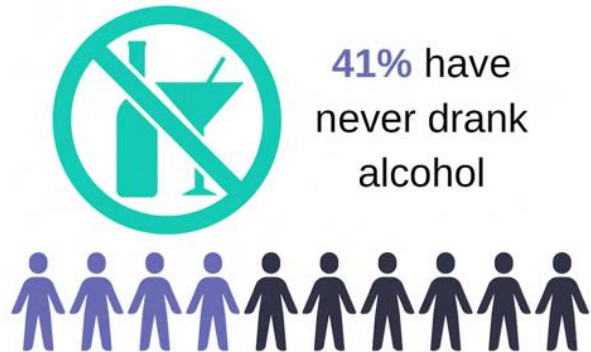

35% travel to school by car or van

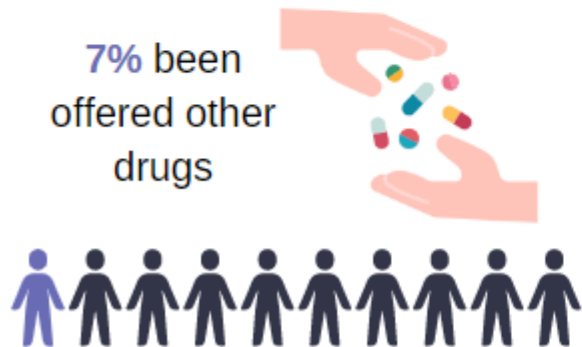

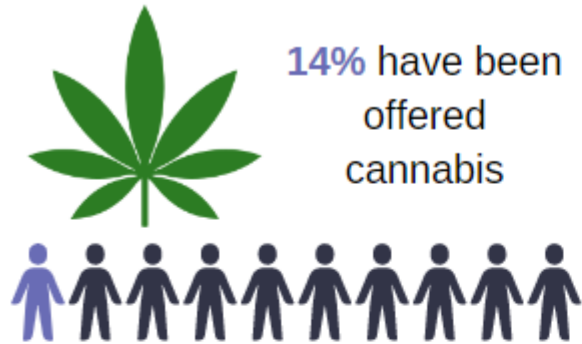

Headline Findings

Smoking and Alcohol

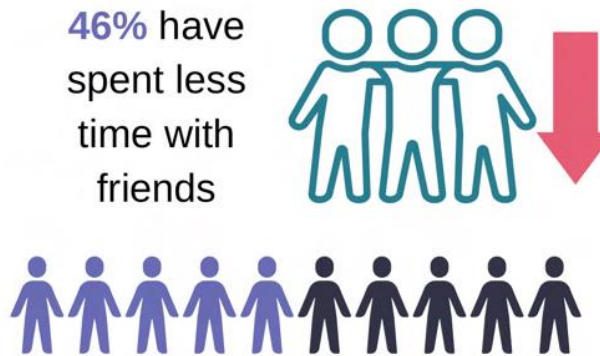

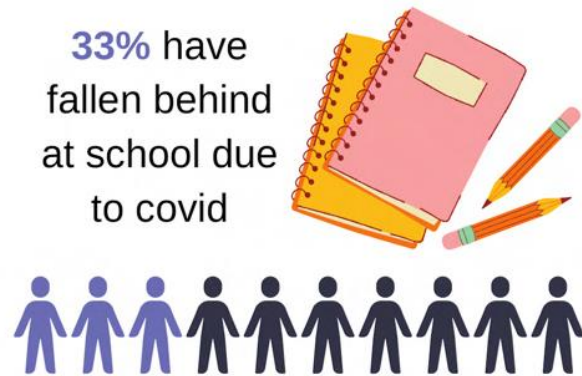

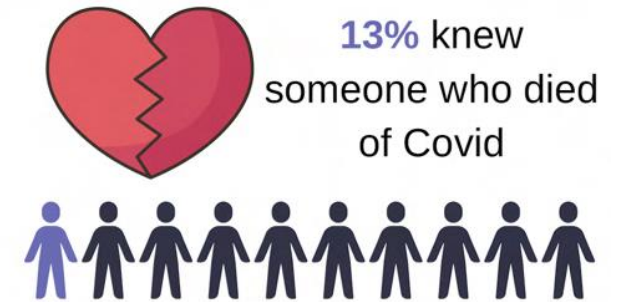

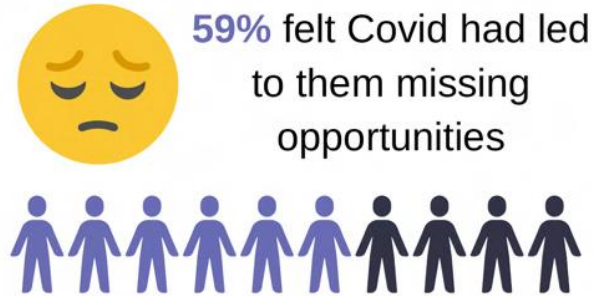

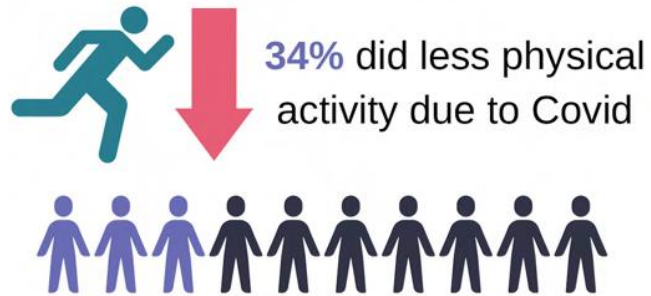

Headline Findings

Drugs, Sexual Health and Sexual Harassment

Headline Findings

COVID-19

Headline Findings

Bullying, Safety and Wellbeing

9% often or very often feel scared going to school because they are bullied

37% have been picked on or bullied due to their size or weight

43% thought their school would not help to stop bullying if they experienced it

57% felt lonely some or most of the time

50% felt happy with their life at the moment

67% feel safe in the area they live

Headline Findings

Free Time, Social Media and Gambling

36% go to the countryside 'hardly ever' or 'never' in their own time

77% use YouTube

28% spend more than 10 hours a week playing computer games

10% read a book at home every day

79% use TikTok

32% haven't done any type of gambling in the last year

Headline Findings

Year 9 Trends*

Did not have breakfast
this morning

+14%

2020: 28%
2022: 42%

Brush teeth at least
twice a day

-6%

2020: 85%
2022: 79%

Someone smokes at
home

2020: 38%
2022: 45%

Worry about
schoolwork and
exams

+3%

2020: 42%
2022: 45%

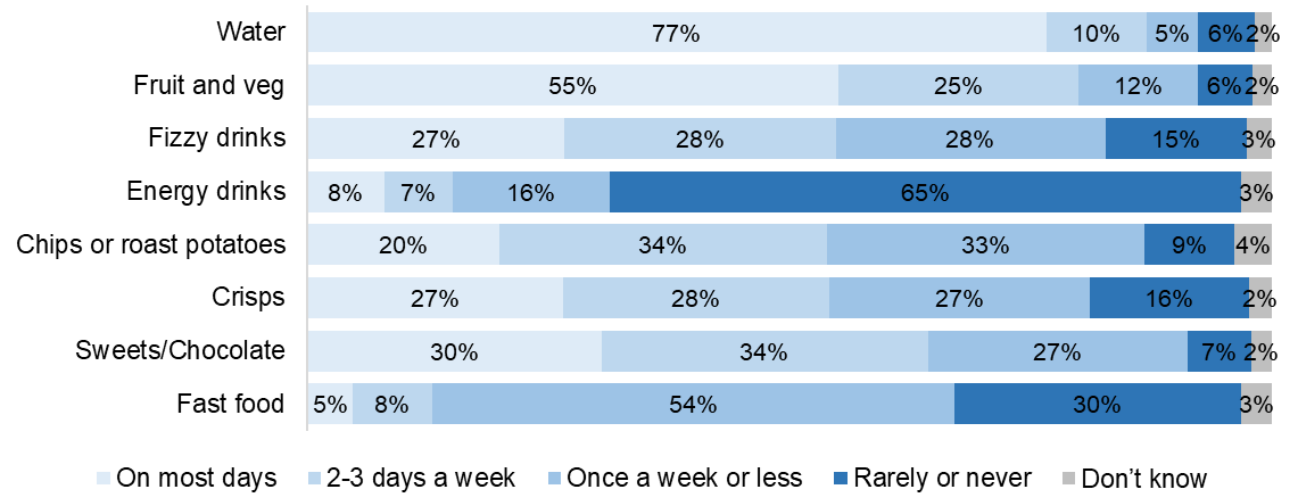

* Change in percentage points

Diet and Oral Health Findings

Did you have breakfast this morning?

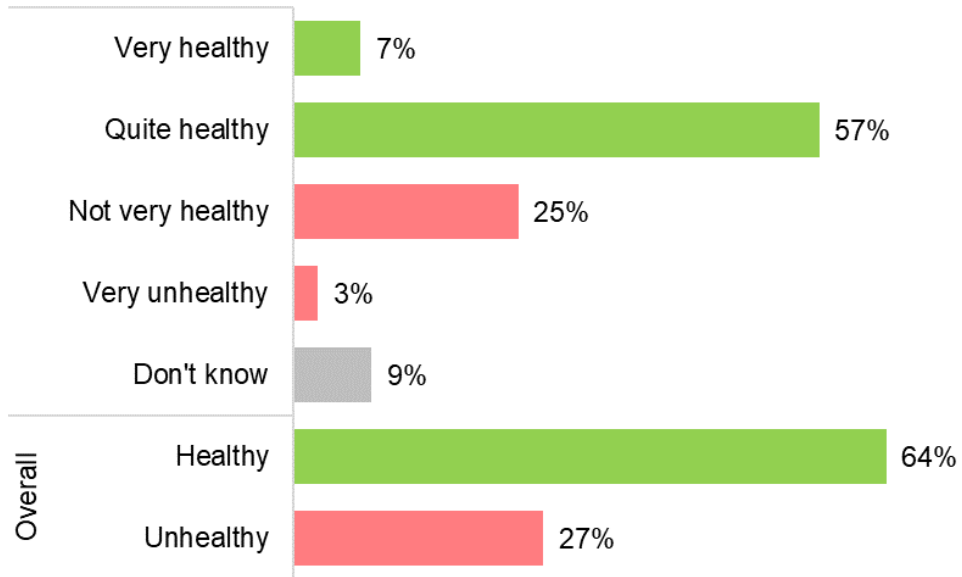

How often do you eat or drink...?

Diet and Oral Health

Findings

Is your diet (the food you eat) healthy?

Do you think you need to eat more healthily?

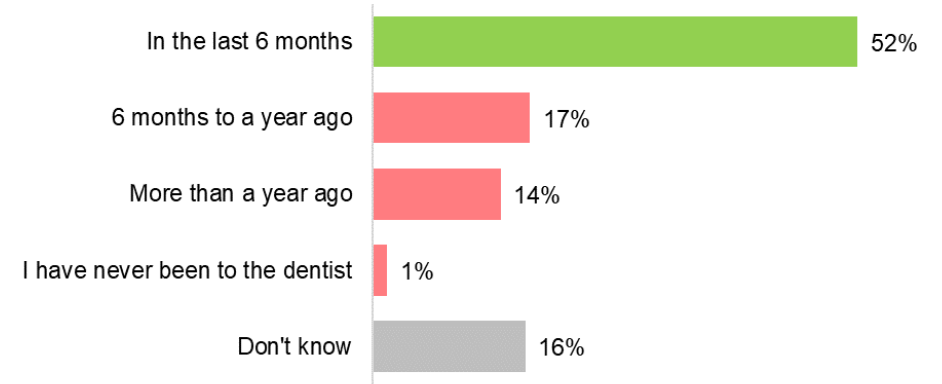

Diet and Oral Health Findings

How many times a day do you normally brush your teeth?

How long ago did you last go to the dentist?

Diet and Oral Health

Inequality analysis

Diet and oral health	All year 9	Male	Female	White British	Other ethnicity	Single parent family	Other family	Young carer	Non carer	Special needs	Non-special needs	Most deprived	Least deprived
